Programme on Mobile Banking Security and Testing (MBSAT)

Coordinator: **Prof. V.N. Sastry**

September 11 – 15, 2017

Mobile Banking Security and Testing (MBSAT)

September 11 – 15, 2017

Coordinator: Prof. V. N. Sastry, Professor, IDRBT

e-mail: vnsastry@idrbt.ac.in

Introduction

Mobile Banking Services of data, voice and multimedia are offered through various long range and short range wireless communication channels. SMS, USSD, Tele-banking, IVRS, Mobile Browser, Mobile Application and Mobile Wallet are popular interfaces for customers to access mobile banking services using GPRS, WIFI, Bluetooth, NFC etc. Privacy and Security are important concerns of users and banks. It is important to learn the evolving technologies underlying mobile device and mobile communication in order to provide customized services. Use of design standards, proper development and security testing of mobile banking applications are necessary for banks and financial institutions.

Objective

To provide inputs on the developments and challenges in mobile banking. The best practices of mobile application development, use of APIs and secure coding practices. The various lightweight cryptographic techniques for enabling secure and efficient mobile banking. The techniques and tools of mobile security testing and vetting process. The processes and interfaces for social media banking.

Contents

- * Mobile Communication Channels,
- * NFC & Wi-Fi Security
- * Internals of Mobile Phone,
- * Mobile Operating systems
- * Mobile Databases, Mobile Financial Services
- * Mobile Banking, Light Weight Cryptography
- * Mobile PKI, Secure Coding, Security Testing,
- * Use and Integration of API, Social Media Banking,
- * Usability and Customer Awareness,
- * Mobile Crowd Sourcing and Sensing, Mobile Cloud Computing

Who Can Participate?

Officials of Banks and Financial Institutions, Interested in Technical Understanding of Mobile Banking, Dealing or Managing Mobile Banking. Level: Scale I to IV.

End Use

The official would be in a position to implement some of the latest mobile technologies in Banks. It would help in using appropriate lightweight cryptography techniques in the development of securing mobile banking applications. The participant would be in a position to guide the organization in mobile application development, security testing and vetting process. It would help to strengthen mobile banking and social media integration.
