DARK WEB MONITORING FOR THREAT INTELLIGENCE

November 23 – 26, 2021

Introduction

Websites are consisting of surface web, Deep web and Dark web. The surface is indexed and monitored, the Deep web is non-indexed but can be monitored, while the Dark web is the unindexed part of web which can't be monitored normally. The dark web is the World Wide Web content that exists on darknets: overlay networks that use the Internet but require specific software, configurations, or authorization to access.

Objectives

- To give basic introduction to dark web.
- To explain working and accessing of dark web.
- To present some real world case studies of involvement of dark web in major cyber security incidents.
- To present top tools and software required to access dark web.
- To discover the information and intelligence present on the dark web.
- To discuss some existing tools to harness the information from dark web.
- To demonstrate our proposed method of information gathering.

Contents

- Introduction to Dark Web
- Working of dark web
- Tools for accessing the dark web
- Demonstration of browsing dark web using TOR
- Activity for participants to find “. onion” URLs on TOR browser
- Extracting information from dark web
- Existing projects and tools to extracting information.
- Demonstration of our proposed method to automate information gathering from Dark web.
