

Programme on

IT PROJECT AND VENDOR MANAGEMENT

Programme Coordinator: **Dr. Abhishek Thakur**

JANUARY 29 - FEBRUARY 02, 2024
(Offline Mode)

INSTITUTE FOR DEVELOPMENT AND RESEARCH IN
BANKING TECHNOLOGY, HYDERABAD
(ESTABLISHED BY RESERVE BANK OF INDIA)

Introduction

IT platforms enable every aspect of banking. As technology is evolving at break-neck speed, there is a rising demand for managers to work faster, smarter, and leaner - often with reduced staff and/or through outsourced service providers. Project management can make or break the project and the teams involved in the execution. Experts worldwide have noted that project management expertise holds the key to greater innovation, improved business performance, and consistent success across the industry, government and community.

This program will equip managers in banks with the latest international practices in project management, so they can effectively face the challenges posed by their dynamic environment with relative ease. The program will not only improve the value we are generating for our organizations, but also improve the value of our lives as we can deliver more output with less effort in shorter times.

Particular emphasis will be on management challenges on IT projects utilizing software-as-a-service, cloud-based deployments and project management for platforms like UPI and mobile applications.

Objective

To provide a solid foundation in project management principles and practice to bankers and IT professionals involved in managing IT projects, especially those delivered through vendors.

Contents

- ★ This program will provide a quick overview of various aspects of software engineering. It will delve deeper into aspects of project management such as stakeholder management strategy, scope definition, developing schedules, cost estimation, managing human resources effectively, responsibility assignment matrix, MIS and communication matrix, project risk management, procurement/ outsourcing management, and so forth.
- ★ Software engineering concepts will be reviewed, and basic architectural patterns will be discussed, emphasizing project management challenges associated with various such patterns.
- ★ Multiple strategies for vendor management, along with best practices, would be covered in the context of various outsourcing models.
- ★ It will also delve into agile project management and dev-sec-ops concepts for fast-paced projects that are a must in the constantly changing business landscape.

Who can Participate?

Officers in digital banking, IT, vendor management, and project management functions involved in managing and implementing IT projects.

End Use

Better project management will increase team performance and improve product quality.
