

Programme on

APPLICATION SECURITY

Programme Coordinator: **Dr. Susmita Mandal**

DECEMBER 09 - 11, 2024
(Offline Mode)

Introduction

The Executive Development Program on Application Security is designed for IT and Information Security professionals in the banking and financial sector. Participants will delve into critical aspects of securing applications, from secure coding practices and vulnerability management to advanced topics like API security and DevSecOps. This program offers a comprehensive blend of theory, hands-on labs, and case studies to equip professionals with the skills to safeguard their organizations against evolving threats.

Objectives

The objective of this program is to equip professionals with advanced skills to secure banking and financial applications. With this knowledge, the participants will be able to implement robust security practices throughout the application development lifecycle.

Contents

- ★ OWASP Top 10
- ★ Secure Coding Practices
- ★ Authentication, Authorization, and Session Management for Securing Web Applications
- ★ Overview of Application Security Testing Methods (SAST, DAST, IAST and RASP)
- ★ Hands-on Exercises on Static and Dynamic Application Security Testing
- ★ Penetration Testing Hands-on
- ★ Mobile Application Security Testing Hands-on
- ★ API Security
- ★ DevSecOps
- ★ Cloud Application Security
- ★ Application Security in Microservices and Containers
- ★ Secure Software Supply Chain
- ★ Securing Open Source Components (with hands-on vulnerability scanning)
- ★ Capstone Workshop

Who can Participate?

Officials from Information Technology and Information Security departments of banks and other financial organizations are invited to participate in this program.

End Use

Participants will be empowered to enhance application security, protect sensitive data, and implement effective security measures within their organizations' IT infrastructure.
